MOTO

CEPSA

MOTORCYCLE LUBRICANTS

CEPSA MOTO 2T RACING

DESCRIPTION

A synthetic lubricant for high-demand two-stroke engines. Its formula provides exceptional performance in-competition and during sporting use.

PRODUCT APPLICATIONS

• For all types of two-stroke engines, especially high-power, high-revolution and high-performance motors.

• For engines used under severe or sports driving conditions, even in demanding races such as "Enduro" and "Motocross", when high engine performance is required while avoiding seizure.

• Compatible with all types of petrol, it should be used as a 2% premix or at the dose recommended by the manufacturer. Can also be used in oil-injection or self-mix systems.

PRODUCT PERFORMANCE

• Its exceptional detergent power stops deposits forming in the engine, preventing the exhaust system from blocking and smoke forming.

• Significantly extends the engine's lifespan, preventing seizure and fouling of the spark plugs.

• Good fluidity at low temperatures for homogeneous mixing with petrol at any temperature and an easy start-up.

• Helps keep the skirt and crown of the pistons cleaner and prevents their rings from sticking together.

SPECIFICATIONS

• JASO FD   • ISO L-EGD   • API TC   • TISI 1040-2541
